EFFICIENCY, SAFETY and NOTES

- ✓ **RELIABILITY AND SAFETY** are guaranteed by a COPPER BOILER. Copper is an explosion-proof and antiscala material. The HEATERS are placed externally, so they NEVER come into contact with water.
- ✓ 1 KW power creates a steam flow equal to 1,2 kg/h (20 g/min). The efficiency of steam is proportional to its flow, not to its pressure. There is no point in having high pressure and a low flow.
- ✓ The whole production is based in Italy, in our plant in Pesaro.
